DETAILED ACTION

Summary

On October 19, 2005, a Notice of Non-Compliant amendment was sent to the Applicant. On March 20, 2006, the Applicant responded with arguments disqualifying the Kawan reference from consideration.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blumberg (6,260,758) in view of Kalthoff (6,026,382).

Blumberg discloses the invention substantially as claimed (col.2, lines 35-65 and col.7, lines 34-57); however, Blumberg does not disclose determining that the ATM user comprises a non-customer. Kalthoff teaches a computer-implemented system and corresponding method for relationship management comprising determining that the

Art Unit: 3624

ATM user comprises a non-customer and providing incentives for the non-customer to become a customer (col.4, line 1 to col.6, line 50). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the step of determining that the ATM user comprises a non-customer, as taught by Kalthoff into the invention disclosed by Blumberg, to provide incentive for non-customers to become customers.

Response to Arguments

Applicant's arguments with respect to claims 1-70 have been considered but are moot in view of the new ground(s) of rejection.
